REASONS FOR ALLOWANCE

Claims 1-6 are allowed over the prior art of record.

The following is an examiner's statement of reasons for allowance:

The subject matter of the independent claims could either not be found or was not suggested in the prior art of record. The subject matter not found was the combination of a venous blood reservoir having a hemoconcentrator disposed within the reservoir and wherein the reservoir and hemoconcentrator are integrated in a single, monolithic assembly in combination with the other elements (or steps) in the claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Leonard (4,800,022), Davidner et al. (6,193,681), Hood, III (6,342,157), and Vallana (EP 0 705 610 A1) are all related art. Leonard, Davidner, and Hood, III all disclose hemoconcentrator & reservoir systems that are the state of the art, wherein the hemoconcentrator and reservoir are connected in series by tubing. Vallana is the closest prior art discloses an integrated hemoconcentrator and venous reservoir, however, they are still connected in series.
